

FBIS-1455/85
14 August 1985

MEMORANDUM FOR: Chief, Domestic Network Group
Office of Information Technology

VIA: Director, Foreign Broadcast Information Service

FROM:
Chief, FBIS Engineering Division

STAT

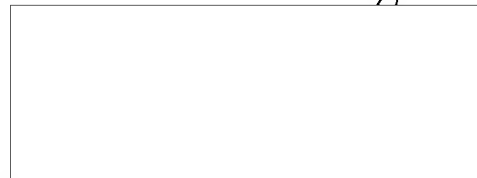

SUBJECT: INTERNET Video Link HQ/Key Building

1. In discussions with your staff, Metro Facilities, we have been advised that our selection of the permanent service option should be elected as soon as possible. This memo documents our selection of the service and our understanding of the conditions of that service. You will note the concurrence of the Director, FBIS which indicates the importance of this to this office.

2. In accordance with the Bell Atlantic quote, which is attached, FBIS would like to elect the second option. It should be noted that we are electing the higher one time cost and lower monthly charge.

3. The two 2-way video channels requested should be in accordance with our discussions with your staff. Specifically, we will require the ability to transmit both video and audio. The audio/video will not be the standard composite normally experienced in U.S. TV. Please contact me or have Bell Atlantic contact me for technical details.

Dear Glen;

As requested the following are the development rates for the permanent service between headquarters and the key building. These prices are for two, two way video channels. I must emphasize that presently these are unapproved, development rates. They represent interim prices that will be approved once the Agency selects a pricing scheme from the alternatives. Although they are not firm, these prices should be suitable for budgeting purposes:

OPTION 1

Monthly	\$ 14,075
1-Time	2,465
Term Liability	\$ 436,940*

OPTION 2

Monthly	\$ 4,470
1-Time	\$385,935

*Reduces 1/60th a month remainder only due and payable if service disconnected or moved.

Once you determine which option is more suitable, please call me and we will complete the approval process, I can be reached on 495-6113.

Sincerely,

Stephen G. Kling
